

# New side plate 700 series motor

by Bob Thompson

Published by North West Meccano Guild, Hints & Tips No 187

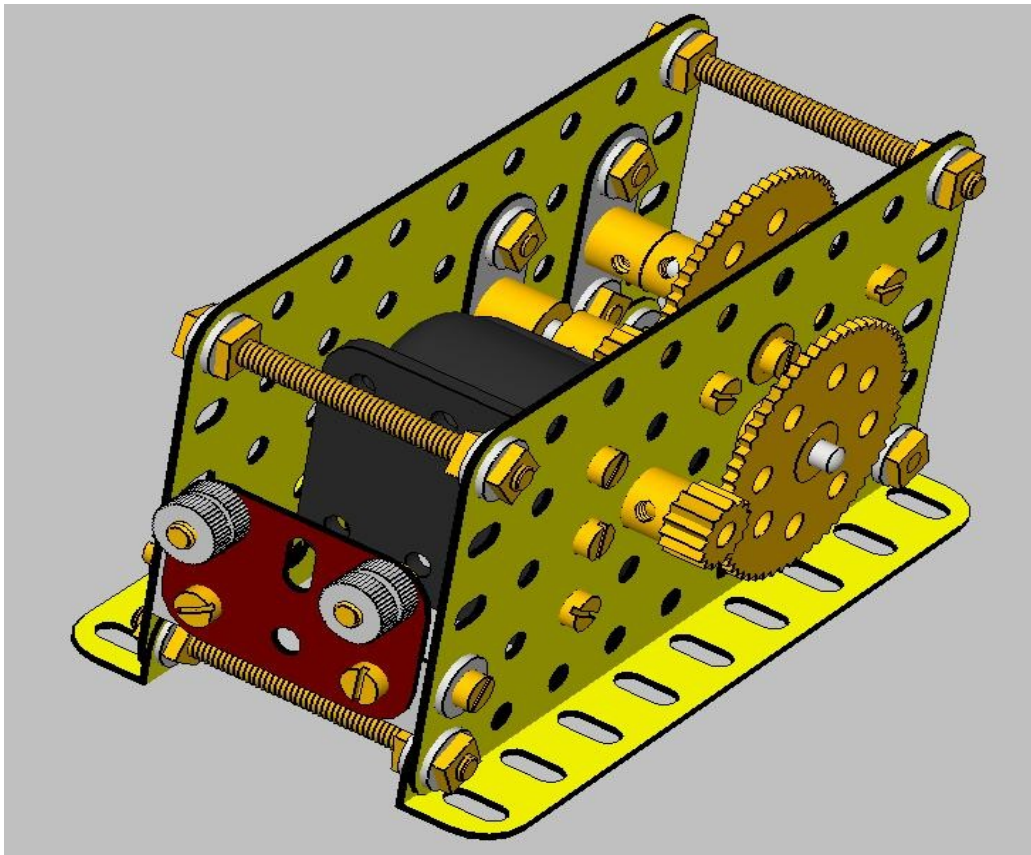

A simple to construct side plate Motor mounting using the 700 series Meccano Motor. Parts list as per table below.

Tip:- Pack all boss holes in part Nos 62b with cotton wool and load with oil, replenish the oil as necessary.

Latest Modification - P/No 508 added to give positive terminal Insulation.

If you wish to add a switch see Tip182 and refer to PDF file for full details by Norm La Croix.

Mini-DPDT centre off toggle switches are available from any good electronics outlet.
